DETAILED ACTION***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims **44, 45, 46, 47, and 48** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims **1, 22, 23, 24, 2, and 3**, respectively, of U.S. Patent No. **6,714,467 (Terzioglu et al)**. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions recite the same identical components, and/or a same equivalent redundant method with similar shifting steps for predecoder. Furthermore, they are drawn toward a same inventive/similar concept of replacing the defective memory cells by "**shifting out**" at least one predecoder (as the first step), and then followed by "**shifting in**" another, second predecoder (as second step), etc.

Art Unit: 2818

3. Other claims **49-56** contain allowable subject matter with regard to the claimed step **"identifying at least one predecoder as first predecoder for shifting out"**, which is also not taught elsewhere in the prior arts.
